The FireSim Driver Simulator provides high-fidelity real-world driving environments to train decision-making and behavior over a wide range of situations facing your emergency vehicle operators everyday.

KEY FEATURES

- Three-channel plasma screen immersive driving environment combines look and feel of a real vehicle.
- State-of-the-art software delivers sharp visuals and crisp images to enhance learning objectives.
- Force-loaded steering provides real-time feedback to augment muscle memory in situations such as a tire blowout or sloshing loads.
- User can choose between fire or Ambulance vehicles

BENEFITS

Ability to create any type of medical, fire, or haz-mat response.

Realistic graphics to teach scene size-up and staging of apparatus.

Practice collision-avoidance techniques while driving to the scene of a fire.

Train drivers to anticipate hazards with emergency response techniques for all types of driving situations.

Firefighter Driving Training Simulator

TRAINING VALUE

- ⦿ **Accident Reduction:** Simulation training reinforces positive decision making through training in realistic, risk-free situations.
- ⦿ **Reinforce Driving Skills:** This will translate into reduced accidents, better decision making and reinforcement of policy and procedure.
- ⦿ **After Action Reviews:** Each scenario is individually recorded with the ability to analyze, reconstruct and implement proper responses and techniques.
- ⦿ **Reduced Equipment Maintenance:** Minimize damage to equipment by repeated practice on the simulator.

The Highest update and refresh rate available in the industry

Glass dash offers flexible gauge placement similar to common fire and ambulance vehicles

SUPPORTING TECHNOLOGY

Choose between fire truck or ambulance vehicles.

Realistic driving environments train drivers how to recognize and anticipate hazardous driving situations (180° view using 3-channels with 1024 x 768 image resolution).

High refresh and update rates provide smooth image flow during any drive at common speeds, creating a comfortable training environment.

Glass dash in the simulator adds greater flexibility in replicating various types of vehicle gauges.

SimCommander allows our instructor to effectively control the simulator via touch screen

WELCOME

OurTrainingRoom.com

Your Training Center for Rapid eLearning

Firemanagement has partnered with OurTrainingRoom.com to develop an online learning system to be used to assist in remedial training, pre-screening and practical reinforcement.

The online learning module can be completely customizable to any fleet or program. This system helps integrate all knowledge obtained during on the job training with the enhanced skills developed during simulator training.

Our eLearning program is a great way to track progress, monitor areas that need improvement and enable participants to spend time out of the classroom setting to synergize all learning obtained through the in-class simulator training.

eLearning can be accessed virtually anywhere, giving the employee the freedom to learn at their own pace and the management to track and record the results. For more information about developing a custom eLearning program, please contact OurTrainingRoom.com info@ourtrainingroom.com
